I take geopolitical events, financial disclosure and incomplete evidence and turn them into stated judgements: probability and confidence given separately, indicators with thresholds set before the data is consulted, and the conditions that would prove the judgement wrong written down alongside it. Claims are labelled fact, calculation or assessment, and what the evidence does not settle is recorded as unsettled rather than filled.

The work spans geopolitical and security risk, sanctions and corporate ownership, credit and financial-crime exposure, and maritime and aviation verification. Currently on Knightsbridge Strategic Group's Professional Experience Intelligence Track on a Middle East portfolio, working as a freelance intelligence analyst for Dilitas Ltd, and pursuing the Intelligence Corps Reserve route with 3 Military Intelligence Battalion.

INTELLIGENCE PRACTICE AND METHOD

Tradecraft. Intelligence cycle and requirements. PHIA probability yardstick, with confidence stated separately from probability. Analysis of Competing Hypotheses and dimension-specific confidence grading. Source grading, indicators and warning, falsifiers and model correction. National Intelligence Model product taxonomy. Intelligence gaps recorded rather than inferred.

Products. Strategic assessments, problem profiles, target profiles, SITREPs and single-page decision briefs. Assessments presented and defended before an intelligence committee on the KSG track. Escalation reporting to senior leadership under time pressure.

Evidential discipline. Every figure traced to a primary filing or registry, under a standing rule that a search-engine summary is a lead and never a source. That rule has caught a fabricated citation and an untraced statistic in my own finished drafts, and both corrections were published rather than quietly made.

AI in open-source work. Used for collection triage and drafting inside that discipline, with source checking and evidential judgement retained. King's College London, War Studies: Artificial Intelligence in National Security. I do not claim experience building or deploying AI tooling.

EXPERIENCE

Intelligence Analyst, freelance — Aug 2026 – present
Dilitas Ltd

- Paid OSINT and intelligence support for a UK surveillance, investigations and due diligence company, working to defined tasking from the investigations team and reporting findings to colleagues acting on them.
- Produced a pre-task subject profile inside one hour for a team already deploying: rapid collection against the immediate requirement, cross-checked sources, confirmed information separated from single-source reporting. Used directly in live operational work.
- Entity, association, adverse information and public-record research across corporate filings, beneficial ownership records, sanctions and watchlist data and court material. Assess source reliability, identify gaps and escalate material uncertainty rather than filling it by inference.
- Weekend and out-of-hours tasking, under commercial client confidentiality throughout.

Head of Communications, Summer School — Summers 2025 and 2026
Aiglon College, Switzerland

- Digital safeguarding for a UHNW pupil cohort under written welfare and access thresholds, assessing incidents involving minors in real time and escalating correctly on first assessment.
- Escalation reports for senior leadership: written quickly, factually and without speculation, for readers making an immediate decision.
- Ongoing social media research on competing international schools and the wider Swiss market, informing internal positioning.

Sales Administrator — Sept 2025 – Jan 2026
Pharos Response, London

- Supported consultants across live incidents at a crisis and reputation consultancy, triaging incoming information and maintaining accurate records across concurrent matters in a confidentiality-sensitive environment.
- Handled institutional clients including the RAF and the Diana Trust, and communicated with organisations of differing technical understanding and risk appetite.

Work placements — 2024 – 2025
Winckworth Sherwood LLP and HCR Law, London

- Analysed policy and legal documentation on Commercial and Media Law desks under live-client confidentiality; legal research, document review and case preparation, summarising material points for fee earners.

Head of Publicity and Marketing 2023 – 2024

Exeter Engineers RFC

- Exercised editorial judgement on reputational risk, including a decision not to publish a viral tour video that would have damaged the club's standing with the university, its sponsors and its members. Comparable clubs later faced consequences for similar material.

SELECTED OUTPUT

The price of a probability September 2026

Ten page all-source assessment tracing the 2026 Israel/US–Iran war into the credit-risk disclosures of four banks, built from the institutions' own filings and House of Commons Library briefings. Judgements graded on the PHIA probability yardstick with confidence stated separately, indicator thresholds fixed before current readings were consulted, and a companion method note recording where an earlier draft was wrong and how it was corrected.

MedGraph 2026

Dependency cascade model with an interactive viewer, separating measured weights from analyst judgement and running sensitivity analysis over the judgements. Python, SQLite, NetworkX. Code and data published.

Commercial Infrastructure, Strategic Dependence July 2026

Forty page study of Chinese state-linked ownership across eleven Mediterranean container terminals against NATO logistical exposure. Dimension-specific confidence grading and Analysis of Competing Hypotheses; two positions where beneficial ownership could not be established are recorded as intelligence gaps. Unpublished, available on request.

Published analysis and case studies 2026

Council on Geostrategy, *Britain's World*, August 2026, reported by *UK Defence Journal*. Chatham House *Common Futures*, April and June 2026. Three method-led OSINT case studies on Substack: a designated individual's corporate network traced across Companies House, BVI records, the ICIJ Offshore Leaks Database and a Supreme Court judgment; a vessel identified from a single photograph; an aircraft resolved to type and operator from a partial cabin window image.

SKILLS AND TOOLS

Corporate, sanctions and investigative. Companies House, beneficial ownership and PSC records, BVI registries, ICIJ Offshore Leaks Database, OpenSanctions, OFAC SDN, court judgments, adverse media. Maltego (certified), Hunchly. Entity resolution on partial-match records.

Geospatial, imagery and tracking. Google Earth Pro, QGIS, Kepler.gl, Mapillary, KartaView, SunCalc, ExifTool, FotoForensics, Yandex, TinEye. ADS-B Exchange, FlightAware, MarineTraffic, IMF PortWatch. Geolocation, imagery verification, vessel and aircraft identification.

Data and technical. Python (requests, BeautifulSoup, pandas, NetworkX), used to build and publish MedGraph including API extraction, a SQLite schema and a graph engine. SQL and SQLite, UN Comtrade API, Excel, GIS and spatial analysis. Reading primary financial disclosure: IFRS 9 scenario weightings, overlays and staging.

Languages. Bilingual English and Greek. Proficient Italian. Modern Standard Arabic begun. GCSE French.

TRAINING AND DEVELOPMENT

- Professional Experience Intelligence Track, Knightsbridge Strategic Group, September to November 2026
- Artificial Intelligence in National Security, King's College London, War Studies
- Corporate Risk and Crisis Management, Institute of Strategic Risk Management, October 2026, a Level 5 course. Surveillance training, Dilitas Ltd, June and September 2026. Introduction to the Threat Intelligence Lifecycle, IBM, August 2026
- Maltego for Cybercrime Investigations, Maltego Technologies GmbH, July 2026. Bellingcat Online Investigation Toolkit, May to June 2026. Harvard CS50P, Python, in progress
- *A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis*, CIA, and the *Verification Handbook*, EU Disinformation Lab, both read 2026 and applied throughout the published work
- Business and Financial Modeling Specialization, Wharton, University of Pennsylvania, and Regulatory Compliance Specialization, University of Pennsylvania, both August 2026
- GIS and Spatial Analysis, University of Toronto, and SQL Foundations, Microsoft, both 2026. AI in Global Competition: The Intelligence Edge, Special Competitive Studies Project, August 2026. AML Fundamentals. Microsoft Office Specialist, certified

EDUCATION AND DEFENCE

BA (Hons) Classics with Italian, 2:1 2022 – 2025

University of Exeter

- Trained in building evidence-based arguments from fragmentary and incomplete source material, which is most of what open source work involves.
- Best Delegation, Bath Model United Nations.

A-Levels A*AA, 10 GCSEs

St James Senior Boys' School, London

Army Officer Selection Board Briefing, Category 1, October 2025, pursuing the Intelligence Corps Reserve route with 3 Military Intelligence Battalion. Combined Cadet Force, Senior NCO. British and EU citizen, UK right to work, eligible for UK security clearance; none currently held. Member, Chatham House and RUSI, including RUSI NextGen since March 2026.
